

How can I check if students can see an assignments' grade and feedback?

This is a quick checklist of things to look at to see if students can view their grade and feedback for **assignments**.

Check List

1. Access the class
2. Identify the activity
3. Review the "not available unless" conditions
4. Check "Hidden from students" row on grading summary (should be **No**)
5. View All Submissions
6. Verify **Reveal Student identities** does *not* appear in grading actions.
7. Check students have grades
8. Check if **Grading Workflow** enabled, if it is:
 - a. Check all grades are in **Released** workflow state
9. View **Gradebook**
10. See [How can I see the visibility of grade items easily?](#) to turn on additional icons to show the status of grades.
11. **Turn Editing on in the Grader Report**
12. Check Grade item for activity is visible (eye should be open) - If the eye has a line through it, the grade item for the activity is not visible to the students. Click on the eye to make that grade item visible and check again.
13. Check Eye is open next to each student's grade - If the eye is closed, the individual grade for that student is hidden. Click on the eye to make that grade visible, or hide and show the whole grade item and check again.
