

# How do I log out of Myplace?

There is no explicit **logout** option in Myplace.

Your login session to Myplace will end when one of the following occurs:

1. You do not load a page from Myplace for 2 hours (see [How long are Myplace Sessions?](#) for more information)
2. You close all of your web browsers windows

In some cases some web browsers may still be running in the background of your PC even though you close all of the visible browser windows.
