

Error: Results have been assigned to an exam board meeting, but one was not sent from VLE

I get the error warning "Results have been assigned to an exam board meeting, but one was not sent from VLE".

▸ [Notes](#)

Problem

When I transfer my marks, many or all of the class comes back as failed on the Validation Report and next to their names when I edit the marks return I get the warning "Results have been assigned to an exam board meeting, but one was not sent from VLE".

Solution

Save and transfer again from the same marks return (no need to create a new one).

Notes

1. This error is similar to [Error: Results have been assigned to an exam board meeting, but a one was sent from VLE](#)
