

I can't see any of the editing buttons on my Myplace class

Problem

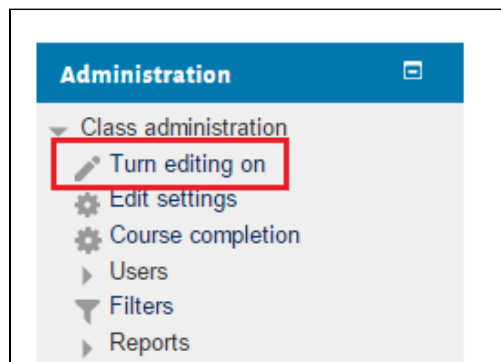

You can't see any of the editing features on your Myplace page. You are logged in.

To enable editing in your Myplace class

1) In the right hand corner of the class page screen and in fact on most pages within your course/class page you will see 'Turn editing on', Click the button and the page will load in Edit mode.

2) There is another way also within the Administration Block on the left hand side of the screen where you can click 'Turn editing on.'
