

Error: 'You do not have access to the gradebook for this class, so are unable to configure gradebook columns.'

Trying to pull gradebook columns through via setting on the class page, I am prevented by this error.

Problem

I am unable to use the settings page to pull gradebook columns through to the class page for marks return.

Solution

It is possible to have electronic marks returner role for a class without having the right to view the class or its gradebook on Myplace. The class manager or other admin will have to give you the tutor role for this class code on Pegasus.
